Leading Through Change with Appreciative Inquiry

Holistic Leadership: From Purpose to Impact

IE Business School × Porto Business School | March 2026

Imagine a company with around 100 people.

That means around 100 families.

Their children — some who could be our parents,

some who could be our children.

Growing at 40% per year. The founders realized they no longer had the capacity or the knowledge to lead it.

They lowered their pride. Elevated their humility.
And started rebuilding everything.

How can holistic leadership help organizations lead through constant change?

The World We Lead In

66%

of European workers have experienced burnout

STADA 2025

70%

of change management initiatives fail

McKinsey

13%

of employees are actively engaged

Our approach: a real case study — PORTILAME — where culture was the DNA, rapid growth fractured it, and the mission became recovering what was always there.

Discover

What works when we lead at our best?

Trust First	Real trust is given before it is earned. It unlocks everything.
Flexibility	Adapting roles and systems to context creates resilience.
Communication	Transparent, consistent dialogue is the foundation of safety.
Proactive Support	Leaders who anticipate needs unlock team potential.
Shared Purpose	When people understand WHY, engagement follows naturally.

Dream

We want every proud face of our people to tell us that their children say:

"My hero is my father!
When I grow up, I want to be like him:

work at PORTILAME."

This culture was in PORTILAME's DNA from the beginning. Rapid growth fractured it. The mission: recover, protect, and systematize what was always there.

And from that journey, build a framework any organization can use.
